WORK EXPERIENCE

GlamPRO Inc.

Toronto, Ontario

Software Developer Intern

May 2024 - Aug 2024

- Developed GlamPRO, a mobile application designed to enhance user experience in the beauty and fashion industry.
- Carried out requirement gathering from users and created interactive prototypes
- Collaborated with teammates to manage project code following the Git flow strategy.
- Agile methodologies for project delivery, managing tasks and progress through 2-week sprints.
- Released three beta versions of the mobile application on Apple TestFlight, successfully passing all of Apple's testing requirements for approval.
- Technology Used: Flutter, Dart, Firebase(Authentication, Firestore, Storage, Cloud Functions), Figma, Algolia

Solutions - For Information Systems

Remote

Freelance Developer

Jan 2020 - Feb 2025

- Developed a hotel reservation and booking software, enabling company and guest reservations with automated email confirmations.
- Developed a POS application for restaurants and cafes, enabling seamless order management, billing, and transaction processing.
- Designed and developed UI/UX and system architecture for applications.
- Maintained and optimized code for legacy software, ensuring stability, performance, and compatibility with evolving technologies.
- Collaborated on GitHub, managing pull requests (PRs), reviewing code, and contributing commits to enhance software functionality and version control.
- Successfully deployed two mobile applications to the Google Play Store
- Technology Used: NextJS, ReactJS, NodeJS, Flutter, Dart, Java, PHP, Material 3, Google Play Console, Firebase, Google Cloud Platform, Vercel, Stripe, MSSQL

PROJECT EXPERIENCE

Humber College

Toronto, Ontario

ITC5103 Final Project

Jan 2023 - Apr 2023

- Developed a web-based POS system for small cafes and restaurants, focusing on speed and simplicity to enhance daily operations for small food businesses.
- Technology Used: React, TailwindCSS, Firebase(Authentication), Vercel

Humber College

Toronto, Ontario

ITE5230 Final Project

May 2023 - Aug 2023

- Developed an Inventory Management System using C# .NET, enabling large warehouses to efficiently track hundreds of SKUs and their locations.
- Integrated barcode scanner support for seamless inventory updates and accurate stock tracking.
- Followed the MVC development pattern, ensuring modular, scalable, and maintainable code architecture.
- Technology Used: C# .NET, MSSQL

Humber College

Toronto, Ontario

ITE5333/5433 Final Project

Jan 2024 - Aug 2024

- Developed an Android-based barcode scanning app using Google ML Kit, enabling retailers to generate bills by scanning product barcodes.
- Implemented application using MVVM architecture.
- Technology Used: Java, XML, Material 3, Firebase
